

Ultimate Joint Complex

Unique dietary support for healthy joint function

DESCRIPTION

Ultimate joint complex provides a unique combination of protective ingredients that work synergistically to:

- Support cartilage and collagen regeneration by providing raw materials for production of glycosaminoglycans (GAGs).
- Support moisture retention, collagen production and skin elasticity.
- Balance inflammatory mediators like cytokines and prostaglandins.

FUNCTIONS

Tender, sensitive joints can limit everyday activities. As we age and continue to put stress on our joints, joint cartilage is compromised. This deteriorated joint cartilage exposes collagen fibers which the body's immune system mistakenly identifies as foreign cells. This triggers an inflammatory response against the collagen containing cartilage within our own joints. Studies have demonstrated however, that undenatured chicken collagen, when taken orally can produce a collagen sparing effect in the body by attracting the body's inflammatory cytokines.

Ultimate joint complex is made from 100% pure, hormone and antibiotic free, low molecular weight hydrolyzed chicken sternum cartilage extract. It is the only patented and clinically-tested source of Chicken Collagen Type II which has been shown to be effective in joint and skin conditions. It contains Cartilage Matrix Glycoprotein which protects cartilage from breakdown, balances inflammatory cytokines and prostaglandins and supports cartilage synthesis. Along with this unique form of undenatured chicken collagen Ultimate joint complex contains chondroprotective agents that support joint, skin and vascular structure, function and lubrication.

The collagen used in Ultimate joint complex contains a minimum of 10% Hyaluronic Acid (HA) a GAG not usually found in other collagen products. HA supports retention of skin moisture and functions as a lubricant between the connective tissue of the skin and is a major constituent of synovial fluid in the joints. Besides its effect in the joints, HA rejuvenates skin, supports the skin healing process and improves skin tone.

Ultimate joint complex also contains depolymerized chondroitin sulfates, which are absorbed up to 5 times better than bovine-derived materials. Chondroitin sulfates support the flexibility and elasticity of many body tissues including connective tissues, the walls of blood vessels and the structural integrity of the heart, brain and skin.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Glucosamine, another ingredient of Ultimate joint complex, supports skin and joint health by supporting the production of GAGs, proteoglycans and collagen. GAGs give shape, elasticity and rigidity to connective tissues. GAGs hold high levels of water in their structure which enables the joints, skin and vascular beds to hold more water, thereby increasing flexibility, cushioning ability and resiliency.

Finally, the inclusion of methylsulfonylmethane (MSM) in this formulation provides an important source of organic sulfur. Sulfur is found in collagen, hormones and immunoglobulins. Sulfur helps maintain proper connective tissue function and formation of collagen. Sulfur deficiencies have been associated with slow wound healing, immune system dysfunction, poor skin health and degenerative joint conditions. MSM supports proper tone, elasticity and texture of the skin and is needed for proper hair and nail growth.

INDICATIONS

Ultimate joint complex may be a useful dietary supplement for individuals wishing to support skin, vascular, joint and connective tissue structure and function.

FORMULA (WW #10288)

2 Tablets Contain:

BioCell Collagen®
(Hydrolyzed Chicken Collagen Type II)..... 1,000 mg
Methylsulfonylmethane 800 mg
Glucosamine HCl (from shrimp and crab)..... 600 mg
Other ingredients: Microcrystalline cellulose, stearic acid, vegetable stearate, croscarmellose sodium, silicon dioxide, pharmaceutical glaze.
Contains shrimp and crab.

SUGGESTED USE

As a dietary supplement, take 2 tablets 1 time daily. For faster results, take 2 tablets 2 times daily for 4 weeks, or as directed by a healthcare practitioner.

SIDE EFFECTS

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.

STORAGE

Store in cool, dry place away from direct light. Keep out of reach of children.

Manufactured For:

Good Life Pharmacy
