

Zinc Chelate

20 mg

Recommended by
Angie Svoboda, Pharm D.

DESCRIPTION

Zinc Chelate 20 mg is a highly bioavailable zinc supplement featuring chelated zinc arginate and zinc glycinate. The chelation process bonds zinc with amino acids to enhance absorption and make the product easier on the gastrointestinal tract.

FUNCTIONS

Zinc is an essential trace element involved in most major metabolic pathways. General signs of human zinc deficiency, which is quite common in the U.S., indicate that zinc has an important function in maintaining immune function, reproduction, healthy skin and growth. Numerous studies support the fundamental role of zinc in healthy immune response in humans. Immune cells must be able to rapidly divide to respond to daily challenges. Like all rapidly dividing cells, immune cells require adequate amounts of dietary zinc.

As a cofactor of the antioxidant enzyme superoxide dismutase (SOD), zinc can be considered an antioxidant nutrient. Zinc supplementation has been shown to increase the antioxidant activity of SOD and provide increased free radical protection. Zinc deficiency is associated with increased oxidative damage.

Chelated zinc is well documented in scientific literature as supporting GI integrity and intestinal permeability. Zinc Chelate 20 mg is designed to help individuals meet their daily zinc needs by providing highly absorbable zinc arginate and zinc glycinate. Look for Zinc Chelate 20 mg to help support:

- Healthy immune function
- Healthy cellular metabolism
- DNA integrity
- Reproductive function
- GI integrity and permeability

INDICATIONS

Zinc Chelate 20 mg may be a useful nutritional adjunct for individuals who wish to increase their zinc levels by using a highly bioavailable form of zinc.

FORMULA (WW #10381)

One Tablet Contains:

Zinc 20 mg
(as zinc arginate and zinc glycinate)

Other Ingredients: Microcrystalline cellulose, hydroxypropyl methylcellulose, vegetable magnesium stearate.

SUGGESTED USE

Take one capsule one to two times daily or as directed by a healthcare practitioner.

STORAGE

Store in a cool, dry place, away from direct light. Keep out of reach of children.

CAUTION

If you are pregnant, nursing, or taking medications, consult your healthcare professional before use.
